

Examples Of PLR Product Packages

Below you will find examples of different PLR packages. Use these to see what others put in their packages and get ideas for what to put in your packages.

Note: Some of these PLR packages are no longer for sale. If you watch the video though you can see me covering them. If you want to see more examples of PLR packages go to JVZoo or WarriorPlus (or similar networks) and search for PLR. Spend a few hours going over the listings you find and create a document with your favorite ones and save it for future reference. PLR packages come and go sometimes very quickly so it's hard to keep this document up to date.

Product PLR Packages – These packages are all what I call product focused PLR packages. The focus is on getting PLR to the main product and the components add value.

Simple PLR Packages – These packages are what I call simple PLR packages and generally just include a few things and are priced really low. This is a great option for those of you who want to build a list of PLR buyers and profit with them by promoting other people's PLR packages as an affiliate and/or driving those buyers into your PLR membership site.
